

**Jetronics India**, established as manufacturers of connectors in 1985, has grown into a leading producer and exporter of MIL C 5015 grade electrical connectors and related accessories.

Jetronics India's continuing mission is to focus on quality connectors, high level of services, cost effectiveness, innovative solutions that satisfy interconnect needs of customers while exceeding their expectations.

**Products**

**Circular Threaded Coupling Connectors**

These connectors are thread coupled and are in conformity to operating requirements of MIL C 5015 specifications for various industrial applications, these connectors are known for their supreme reliability, high power carrying capacity, their inherent ruggedness and capacity to withstand extreme environmental conditions. Different insert layouts as per MIL STD 1651A and different contact sizes allow carrying of current upto 150 amps. The standard MIL C 5015 insert layouts permit mixing of power and signal contacts.

**Reverse Bayonet Coupling Connectors**

These connectors have identical insert arrangements as threaded coupling connectors but differ as to coupling which is bayonet type offering improved moisture sealing, faster more positive coupling and uncoupling and improved vibration resistance, these connectors are intermateable with VG 95234 and 121B connectors.

**Connector features**

**Light Weight and Rugged Shell**

These connectors are made of Aluminium alloy resulting into a rugged connector with minimal weight.

**Environmental Resistance**

These are corrosion-proof vibration proof and also resistant to heavy condensed atmosphere.

**High Current Carrying Capacity**

These connectors can carry upto 150 amperes and 3 KV, depending upon the connector size and insert arrangements.

**Resilient Insulator and Grommet**

Insulators and grommets are made in polychloroprene making them resilient to varying environmental conditions.

**Wide Varieties of Contact are available**

High reliability machined contacts with silver or gold plating are available in sizes 16 through 0, to accommodate wire guages from 16 to 0 SWG.

**Multi Contacts are available**

Different insert layouts permit multi pin arrangements up to 52 pins.

**Applications**

**These Connectors are served in the following industries and application:**

- |                        |                        |                                  |

**MATERIALS AND FINISH SPECIFICATIONS**

- Shell Material** : Aluminium Alloy
- Insulator & Grommet** : Polychloroprene
- Contacts** : Copper Alloy
- Plating – Contacts** : Silver / Gold or Nickel (Optional)
- Plating – Shells** : Cadmium Plated With Olive Drab Chromate Finish

**PERFORMANCE SPECIFICATIONS**

- Current Rating** : Up to 150 amperes (Depending upon the contact size and arrangement)
- Wire Termination** : Solder / Crimp
- Working Voltage** : 200 to 3000 V AC (Depending upon the contact size and arrangement)
- Insulation Resistance** : 5000 M min. at 500 V DC
- Temperature Range** : -55°C to +125°C
